THE COTTAGE SCHOOL

OUR MISSION

Building a sense of self for students with special learning needs through academic and experiential programming, The Cottage School prepares individuals for fulfillment of their true potential as confident, productive, and independent adults.

OUR STORY

The Cottage School offers hands-on instruction utilizing a work place model geared toward students, grades 4-12, with learning differences and attention deficit disorders.

The Elementary School allows students in 4th and 5th grades to receive crucial specialized educational instruction while thriving in the school's business model. A full curriculum and experiential learning emphasizing Kagan Cooperative Learning Strategies, STEAM-based robotics and the Brain Gym activities are examples of the daily academic programming. The Cottage School faculty is highly experienced, trained and motivated to tailor instruction based upon students' unique learning differences.

Middle school is a time when students are trying to "fit in" and be accepted. The Cottage School teachers and staff provide an excellent academic foundation and an opportunity for your child to grow socially in a safe environment, setting the foundation for a successful high school experience.

High school culminates with post-secondary plans inclusive of college, internships, and the world of work. Along the way, there are opportunities for your child to get involved in art, music, drama, culinary arts, horticulture, horseback riding, photography, and athletics, while embracing a strong academic curriculum.

For more than 32 years, our graduates are successful young adults ready to embrace life beyond The Cottage School.

OUR SUPPORTERS

It is the support of community partners, friends and our families that sustains The Cottage School's unique mission. Please consider joining us in sponsorship or donations. Our events each year that support tuition assistance are the **Cougar Classic Artisan Market, Bike and Car Show and Glitter.**
